ABOUT US

OUR VISION:

At Central Valley Tree and Arborist Services LTD. we are an educated, caring team working towards maintaining a healthy balance between a safe and a lasting urban forest.

PURPOSE:

TO PROVIDE SAFE, LEGAL AND QUALITY SERVICE

TO BEST SATISFY OUR CUSTOMER'S DESIRES.

TO PROVIDE PROFESSIONAL SERVICE TO THE RESIDENTIAL AND COMMERCIAL SECTOR.

TO MAINTAIN AND GROW OUR FLEET.

TO EDUCATE OUR STAFF AND EXPAND OUR SKILL SET.

7 CORE VALUES

1 We believe success depends on providing honest and professional work for our client's needs.

2 We work in conjunction with the bylaws and regulations of our surrounding communities.

3 Our standard is to always acknowledge what is right and what is true.

4 We have a fundamental respect for people and our urban forest.

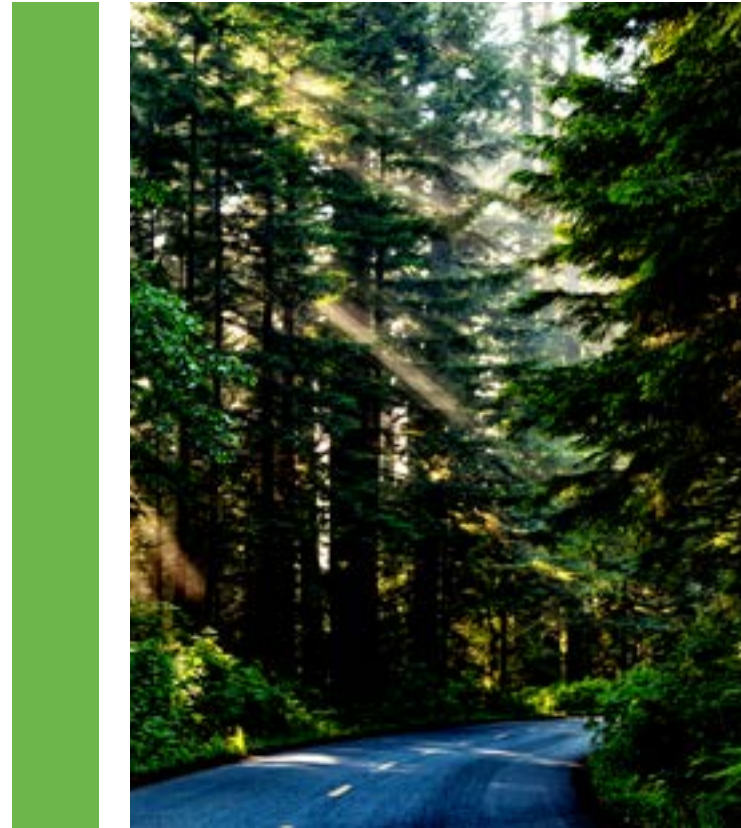

5 We recognize our staff as our most valuable resource and our most competitive advantage.

6 We believe in an organized culture which promotes a spirit of teamwork and family.

7 We encourage and support continuous learning and development resulting in career growth.

SERVICE LINE TRIMMING / ROAD SIDE CLEARING

Our crews are familiar with working around power and telephone lines and are more than capable to work around even the most tangled trees. We have done roadside trimming for local municipalities.

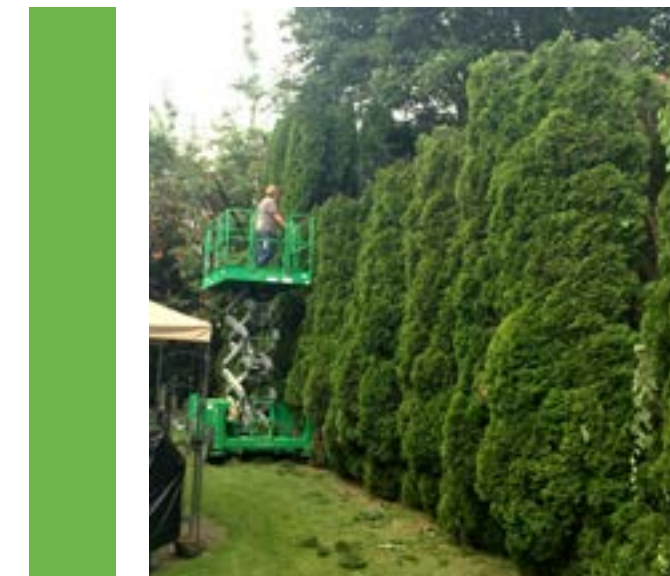

TREE REMOVALS / HAZARD TREE REMOVALS

We do our best to complete the work required with a high level of safety for our employees and our customers. All of our bucket lifts and trucks are safety certified every year. We strive to keep our equipment well maintained and in proper working condition. Our team is trained to safely work with hazardous and large trees in a timely manner. We work to ensure our customers have peace of mind with every tree we remove.

TREE BRACING

We aim to keep trees healthy. One way we accomplish this is tree bracing. This avoids possible failures and mitigate risks from included bark, weak branch attachments or decay cavities in trees throughout the lower mainland. We use a non-invasive cabling system that does not drill or core into the trunk which would put the tree at risk of infection and/or infestation.

TREE PRUNING / HEDGING

Our team members are outfitted with the proper equipment and are skilled in pruning a variety of trees according to the ISA standard. We have well trained tree climbers to suite every need or desire.

MAINTENANCE PROGRAMS

We have maintenance programs in place to fit your needs; Whether that means planning out regular hedge trimming, annual fertilizer treatments, or fruit tree pruning. We can put together a schedule with reminders of when we should come to keep up on maintenance.

TREE WATER BAG FILLING / DEEP ROOT WATERING

We provide watering services to help keep moisture in the soil and keep trees healthy and vigorous. Water bags are a great way to keep roots moist with a slow trickle on a regular schedule throughout the hot season. Deep root watering helps get the water in the ground directly to the root zone allowing the tree to immediately and easily uptake water.

DEEP ROOT FERTILIZATION

Soil injection fertilization is implemented by injecting a liquid fertilizer into the soil about 8"-12" deep. Fertilizer is injected below the roots of the surface vegetation (such as lawn or ground cover) where it is available to the absorbing roots of shrubs and trees. This process also has the added benefit of leaving holes in the ground to aerate the soil and allow for better gas exchange. Soil injection fertilization is a perfect treatment for trees and shrubs that have undergone stress (such as construction damage, drought stress, nutrition deficiencies).

TREE PEST MANAGEMENT

If a tree has a pest problem, we can help. Our staff is trained in the identification of different tree pests and diseases. We can put together and implement a treatment program. We have a spray unit and all the necessary pesticide application certifications.

STORM EMERGENCY SERVICE

Our past relationships with cities and districts have proven beneficial to both parties. Whenever a storm hits, we put our clients on the top of our priority list. We are skilled and equipped to work with cranes to remove large fallen trees on houses, we can also clear off roadways with a pick-up truck and so much more.

ANIMAL RESCUE

Our team has helped many cats stuck in trees and have worked around raccoons. We have even helped free two eagles that were tangled in a tree which was featured on Global News.

OUR COMPANY

Our job is to provide safe and professional services across the Fraser Valley. We are fully licensed, fully certified and fully insured. We are easy to work with and make this process as stress-free as possible. We choose to continually do our part to maintain a safe and beautiful urban forest.
